NadraiN

F O R T E

NATURAL ENLARGEMENT AND FIRMING

New formulation NadraiN FORTE strengthened by two complexes for youthful skin of the chest and breasts without fat pads.

✓ FOR BREAST ENLARGEMENT

contains a complex **Active Form**

Isoflavones with flavones of safflower, soy and hops increase and maintain the natural shape and volume of the breast.

✓ FOR FIRMING BREASTS

Contains a complex **Active Volume**

Lignans with phytoecdysteroids and Leuzea increase the density of the breast tissue and contribute to greater strength and fullness of the breast.

✓ FOR FLEXIBLE AND YOUTHFUL SKIN BREAST

Contains complex **ActiSkin**

Essential fatty acids with isoflavones from pomegranate, safflower and evening primrose keep breast skin moisturised, smooth, supple and reduces wrinkles.

✓ FOR BREAST WITHOUT FAT PADS

Contains complex **ActiSlim**

Phytoecdysteroids with isoflavones, Leuzea and safflower reduce excessive deposition of fat tissue in the breast.

**The two-month treatment:
60 capsules**

Swiss Pharmaceutical Investment has developed and is responsible for this document.

It is proven that isoflavones can positively affect many tissues in women's bodies. Recently, serious scientists are increasingly focusing their attention on breast tissue.

These are proven beneficial effects of isoflavones on breasts:

- ✓ increases the density of the breast tissue, which is directly reflected in the increase in volume and strengthening breast
- ✓ reduces slackening and breast tenderness (mastalgia) during menstruation or menopause.
