**90**  
nights

## EFFECTIVE SOLUTION AGAINST SNORING

The snoring occurs more often in men and is described as inspiratory sound of the trepidation of soft parts of the upper airway, such as the soft palate, cervical and nasopharyngeal tonsils.

### PSSst!

The recommended method of application:

- **This improves the patency of the upper airways and reduces snoring.**
- **It soothes and moisturises the mucous membrane.**
- **It removes the feeling of dryness and sore throat.**
- **It keeps the mucous membrane clean and reduces unwanted halitosis.**

### VOLUME CONTROL COMPLEX™

- **It is effective from the first night**  
This effectively reduces the intensity and volume of snoring from the very first night.
- **It reduces snoring** in the long term.
- **It has a pleasant** orange flavor

### PSSst!

It contains a unique active ingredient **VOLUME CONTROL COMPLEX**, which is a unique combination of plant extracts eyebright, milk thistle, hops rotary, panthenol, sage, eucalyptus oil and menthol. The herbal extracts act on the soft parts of the upper airway through a tightening and firming effect. It dampens vibrations and their inhalation and thus reduces snoring. Panthenol soothes and moisturises the mucous membrane and reduces the feeling of dryness and sore throat after waking. Sage and eucalyptus essential oils enhance the overall activity of plant extracts, keeps the mucous membrane clean and reduce undesirable odour from the mouth. Menthol cools, having a slightly numbing effect and improves the patency of the upper airways.

### Mechanisms of action of product PSSst!:

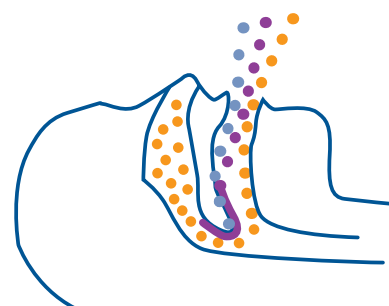

- **It effectively reduces the intensity and volume of snoring from the very first night.**
- **The primary mechanism of action is an astringent effect of herbal extracts + moistening the mucous membrane**

The folder name	The quantity of ingredients in 1 dose (- 0,1 ml)
The extract of hops rotary ( <i>Silybum marinum</i> )	1,3 µl
Extract of rotating hops ( <i>Humulus lupulus</i> )	1,7 µl
