firming substances: microcrystalline cellulose, sweetener: maltodextrine, extract of green tea, filler: cornstarch, povidone K30, extract of curcuma, anti-caking substance: magnesium stearate, silica.

Chlorella

It is a microscopic algae representing natural, traditional cleaning and strengthening remedy. It is a source of all kinds of essential nutrients, vitamins, minerals and trace elements. It helps to start the process of pumping vitality and after that the quality regeneration of cells in the body. Furthermore, its cell walls are fragmented a special technological process on the active microscopic fragments that manage to bind to each other and eliminate toxic substances and metals from the body. It has a salutary effect on the organs with the ability to detoxify – i.e. the function of the gallbladder, liver and kidneys. Furthermore, it supports the digestive system.

Green Tea

It is a traditional stimulant of natural resources from the most quality leaves and buds of tea plants. It has antioxidant effect and complements the effects of chlorella.

Curcumin

Extracted from the roots of the turmeric plant it is used as a traditional natural source of antioxidant effects and helps to reduce oxidative stress.
